

# Green Wisdom School of Natural & Botanical Medicine

## *Some of Our Favorite Seed Catalogs*

We love dreaming and planning about what we'll grow in our gardens in upcoming season. Some of us have been seed catalog junkies for decades! This is a list of some of our favorite seed sources. We regularly ask green thumb friends and herbalism students for input. Here's our recently compiled list. Some of the criteria included: seeds, roots, rhizomes and plants that are organic, non-GMO, heirloom seeds. Plus those businesses that practice seed-saving, protect genetic diversity, ethically cultivate plants, have policies of good service, land stewardship & conservation. Some are privately owned companies, others are non-profits working on issues from sustainable agriculture to food equity.

Sit back with a cup of healing herbal tea and get started!
